THIS YEAR'S DISTINGUISHED PRESENTERS

1. **Dr. Bill Bass**

Famed forensic anthropologist and creator of the world famous "Body Farm", Dr. Bass is one of the most electrifying speakers in the U.S. His knowledge of crime scenes, and the secrets they hold, is second to none. What EMS needs to know, the 'do's and the don't' of working at a crime scene, will come from the man who wrote the book on the subject.

2. **Dr. Jeff Guy**

This Vanderbilt University Medical Center Surgeon is one of the leading experts in pre-hospital burn care. His vast experience and knowledge is critical to EMS and their care of burns in the field.

3. **Steve Forry EMT-P Retired**

This speaker is presented by the courtesy of Volunteer Fireman's Insurance Services (VFIS). Along with many years of working with EMS related services, he has vast experience in legal claims against emergency services.

4. **Tre Lundquist**

After years of law enforcement experience in military and civilian life, Tre has spent the last 13 years presenting classes on 'staying alive' on and off the job. His informative, and often humorous way, of imparting this info has him on our 'bring him back' list.

5. **Rick Slavin - Paramedic Instructor**

This charismatic presenter has the ability to impart his many years of field experience in an interesting and straight out honest way. No holds barred.

6. **Greg Miller - EMT-P Fire Chief**

This previous Professor of Emergency Services and Paramedic Program Director is dynamic in his approach to lecturing. His vast knowledge is evident in his presentations.

7. **Lt. Larry Williams - JCPB**

Larry is an experienced Master Police Officer and Traffic Accident Investigator. He has traveled the U.S. for years, training others in accident investigation.

8. **Lt. Dan Wheeley EMT-P Rescue Instructor**

Dan is one of the highest trained rescue specialists, in all the various rescue disciplines, in the Southeast. Besides being a full time Paramedic and devoted family man, he somehow finds time to own his own rescue training service.

9. **Lt. Doug Gregg WSCD**

This experienced officer will cover some of the dangers EMS can very possibly face in today's environment. What to watch for can save your life.

10. **Capt. Brian Ramsey**

Each day the number of Haz Mat increases. This presenter works daily in a city-sized work environment that is literally filled with an unbelievable number of Haz Mat dangers. What you may face, and what to do.

11. **Bishop Matthew Barber**

Unless this is your first conference, you already know him. Matthew has his own congregation as well as being Chaplain for EMS. Washington County Sheriff's Dept. His inspiration flows from him as he speaks from the heart about you and your job.
